

Business Broadband Connection Voucher Scheme Case Study

T'Go Creative Limited

Langley Place, Perth, PH2 7XB

www.tgocreative.co.uk

T'Go Creative Limited is a homebased graphic design, website design and print company based in the Kinnoull area of Perth. The team at T'Go can design anything from a new company identity/logo to a full rebrand, from business cards to a bespoke website or a simple sign to huge banners and vehicle signage.

The business has clients throughout the UK and internationally including USA, Malta and Australia so relies on secure, superfast communication systems.

Gary Paterson, Director benefitted from the Broadband Voucher Connection Scheme. Gary says "Large files are being sent to and from the studio on a regular basis and working predominantly online in the studio requires a fast link to the outside world.

Creative software updates happen frequently, uploads to online cloud services are carried out weekly and some of these files can be 1tbit in size.

As website designers we also require reassurance that we can get onto a client's site quickly to make any alterations or fix any problems.

The Broadband Connection Voucher Scheme has ensured we have the fastest speed at a fantastic cost. Our jobs have been made easier with this lightening quick link to the outside world".

Supplier: Virgin Business Media

Voucher amount: £282
