

Business Broadband Connection Voucher Scheme Case Study

Perth Garage

Arran Road, Perth, PH1 3DZ

www.perthgarage.co.uk

The Perth Garage is Perthshire's largest independent garage based in Arran Road which is a one stop garage offering MOTs, repairs and servicing.

David Forbes, Owner says "Our small network of computers in the front office and workshop now enjoy faster broadband.

They previously encountered problems with slow broadband and downtime which caused difficulties for customers who were awaiting price details. The business also had difficulty ordering parts online due to the slow connection. In addition, they were paying to use an old fax phone line to process credit/debit payments for customers at the garage.

As a business we experience less delays with activities such as checking online services with the DVLA, ordering online and processing card payments thus reducing delays for customers.

To overcome these problems, Perth Garage applied to the Broadband Connection Voucher Scheme.

Our telephone/broadband costs have also worked out cheaper on a monthly basis which is an additional bonus".

Supplier: Virgin Business Media

Voucher amount: £385
