## Generic Falls Environmental Risk Assessment

Bathroom and shower rooms	Area o			Remedial action required to
	consid	-		address significant finding
	Yes	No	N/A	
Are floor coverings of bath/shower rooms a different colour from wall coverings?				
Are floor coverings provided with a non-slip surface?				
Are floor coverings free of defects?				
Is a system in place to ensure spillages are				
cleaned up without delay to prevent slippage risks?				
Are handrails positioned properly and securely next to toilet, shower and bath?				
Are raised toilet seats available which are well				
fitting and secure?				
Do toilets have surrounds to provide support for user getting on/off?				
Are non-slip mats used in bath/shower?				
Are receptacles for soap/shampoo easy to				
reach and do not require user to bend over?				
Do all shower chairs have adjustable legs,				
armrests and rubber stoppers on legs?				
Do commode chairs have wheels, castors,				
brakes that work smoothly and effectively?				
Do all shower chairs and commode chairs have seat belts or safety bars?				
Are areas immediately around bath and sink				
marked in contrasting colours?				
Is there room for a seat in/near shower?				
Are call buttons accessible from a sitting position in the shower?				
Is suitable transfer equipment (side loading				
trolley, hoist, etc) provided for users?				
Is bathroom/shower room free of stored				
materials that could present a tripping risk?				
Is bathroom/shower room door able to be opened/closed easily by user?				
Is bathroom/shower room free of a change in floor level?				
Is bathroom/shower room provided with				
adequate lighting?				
Passageways	Yes	No	N/A	
Are passageway floor coverings a different colour from wall coverings?				
Are floor coverings in passageways free of defects?				
Is a system in place to ensure any spillages are				
cleaned up without delay?				
Are passageways provided with adequate lighting?				
Are passageways free of a change of floor level?				
Are adequate handrails provided along length				
of the passageway?				
Are passageways wide enough to allow people		1

## **Generic Environmental Checklist**

The Generic Environmental Checklist pertains to the entire environment within the care home and its grounds where service users might spend some of their time.

Instructions for Use:

- Overall responsibility to ensure the completion of the environmental checklist lies with the home manager. This is necessary as remedial action may involve major and/or costly modifications to the area or changes in the operational activities within the area.
- The checklist should be carried out at least annually
