

Community Planning in Perth & Kinross

In order to deliver better and more co-ordinated services that meet local people's needs, a number of key agencies work together in a **Community Planning Partnership (CPP)**.

The Perth & Kinross CPP Community Plan covers key challenges and issues (focussing on **inequalities***), and what services and communities need to do to tackle them.

In Perth and Kinross, communities have Local Action Partnerships (LAPs) which support communities and services to tackle key challenges and issues facing their area. A Local Action Plan for each LAP highlights these and what will be done locally to tackle them. Find out more at www.pkc.gov.uk/communityplanning.

**An inequality is where people in a community experience disadvantage compared to others - this can be economic/employment; physical and mental health, education & training; and access to key services.*
